VAPES, ECigs, and JUULing -What Families Need to Know

Did you know teens as young as 13 are vaping? E-cigs, just like cigarettes, are being promoted by Big Tobacco to young people in hopes of making them customers for life.

Tuesday May 8, 2018 6:30PM-8:30PM
Bernice Ayer Middle School
For students and parents

These are some facts:

- Vaping fumes have no odor and are hard to see or detect.
- Vape liquid/juice and the delivery devices contain over 2,000 chemicals many of which are harmful when inhaled and may cause cancer.
- Although the package may say they are nicotine free – many are not since the labeling and advertising are not yet regulated.
- An adolescent who is using any type of tobacco or nicotine product is at elevated risk of smoking cigarettes- JAMA Pediatrics 2018
